

MOHD AFFAN

Aspiring Data Analyst

+91 8174000720 | mohdaffan020@gmail.com | [LinkedIn](#) | [Github](#)

SUMMARY

Data Analyst with practical experience using **SQL**, **Python**, **Excel**, and **Power BI** to analyze data and build **interactive dashboards**. Passionate about solving business problems through data by cleaning, exploring, and visualizing datasets to uncover meaningful insights that support better decision-making.

TECHNICAL SKILLS

- **Programming:** Python (Pandas, NumPy), SQL, C
- **Databases:** SQL, PostgreSQL, MySQL
- **Analytical Tools:** MS Excel (Pivot Tables, VLOOKUP/XLOOKUP, Power Query), Power BI (DAX, Data Modeling)
- **Core Concepts:** Exploratory Data Analysis (EDA), Data Cleaning, Data Modeling, Statistics
- **Web Fundamentals:** HTML, CSS3, JavaScript

WORK EXPERIENCE

GandhiFellow | *Piramal Foundation*

2024–2025

- Collected, cleaned, and analyzed large-scale educational and healthcare datasets using Excel and Python, identifying trends and performance gaps across partner institutions.
- Designed and maintained Excel dashboards to track 10+ KPIs, improving monitoring accuracy and reducing reporting turnaround time.
- Translated raw program data into actionable insights presented to stakeholders, directly informing decisions on program improvements.

PROJECTS

Decathlon Sales & Customer Analytics | *MS Excel* | [GitHub Repo](#)

- Analyzed Decathlon sales and customer transaction data in Excel using Pivot Tables, XLOOKUP, and conditional formatting to surface revenue and category trends.
- Built an interactive sales dashboard tracking revenue, order volume, and customer segments to support merchandising decisions.
- Cleaned and standardized inconsistent transactional records, improving the accuracy and reliability of downstream analysis.

E-Commerce Cart Abandonment Analysis | *Power BI, DAX, Power Query* | [GitHub Repo](#)

- Built an interactive Power BI dashboard analyzing cart abandonment patterns across the online purchase funnel, pinpointing key drop-off stages.
- Developed DAX measures to track abandonment rate, conversion rate, and revenue impact by device, traffic source, and product category.
- Modeled and transformed raw transactional data with Power Query, delivering a clean, refreshable reporting layer for stakeholders.

Netflix Content Analysis | *SQL, PostgreSQL* | [GitHub Repo](#)

- Performed exploratory data analysis on a large Netflix titles dataset using PostgreSQL, writing complex queries with CTEs, window functions, and string aggregation.
- Answered 10+ business questions on content-type distribution, ratings, and release trends to support content strategy decisions.
- Unnested and aggregated multi-value fields (country, genre, director) to surface top-performing markets and content categories.

Customer Churn Analysis | *Python, Pandas, Matplotlib, Plotty* | [GitHub Repo](#)

- Built an end-to-end customer churn prediction pipeline in Python, covering data cleaning, EDA, feature engineering, and model building.
- Visualized churn trends and feature importance using Matplotlib/Seaborn to translate model outputs into retention recommendations.

EDUCATION

Master of Computer Applications | *Kamla Nehru Institute of Technology, Sultanpur*

2025 – Present

Bachelor of Science (Physics) | *Aligarh Muslim University, Aligarh*

2020 – 2024

COMPETENCIES

Analytical Thinking | Problem-Solving | Communication | Adaptability | Stakeholder Management
